Subject: CFAC update

Hi Lisa,

Happy New Year. I just wanted to touch base on where we are and follow up on our idea of getting together in Columbia Falls this month. There is a Community Liaison Panel meeting on January 21, 2016. We (the EPA) will be presenting the communities options under the AOC and steps forward.

I also wanted to let you know if you haven't heard that CFAC had a hit for lead around one of the buildings. The sample results are from some of Calbags testing. Roux, the contractor for Glencore is putting together a draft sampling plan to further investigate this area. You will be receiving a copy of the draft. If you have any comments on the draft feel free to send me your comments so I can send them with mine.

You and I had also talked about potentially getting together to discuss Libby and field activities.

Are you still planning on joining us in Columbia Falls? Give me a call when you can so we can discuss details.

I also have an update to discuss with you.

Thanks,
Mike
